YIZHEN (BELLA) SHI
La Jolla, CA (623) 810-4218 shibella590@gmail.com

EDUCATION

Master of Science in Business Analytics, Rady School ofManagement 12/2026
University of California, San Diego
. Coursework: AI-assisted Customer Analytics, Business Analytics & Predictive Modeling, Business Intelligence & Information Systems, Pricing Analytics, Customer Analytics

Bachelor of Science, Finance 05/2025
W. P. Carey School of Business, Arizona State University, Tempe, AZ
. Coursework: Security analysis and portfolio management, Business statistics, Financial cases and modeling, External reporting.

GPA: 3.81

PROFESSIONAL EXPERIENCE

Data Analytics Consultant, *Feedback Loop(EduSourced)* *03/2026-present*
. Analyze survet and usage to uncover user engagement patterns, aiming to improve product adoption and inform retention strategies.
. Develop engagement metrics and segment users into cohorts to identify at-risk users and support early detection of potential churn.
. Design and build an interactive analytics dashboard to deliver actionable insights for marketing and customer success decision-making.

Finance & Stock Compensation Extern, *Equity methods* 03/2026 - 03/2026
. Built multi-scenario Excel models to forecast stock-based compensation tax impacts and settlement outcomes.
. Analyzed grant and exercise datasets in SAS to calculate shares outstanding and Compensation Actually Paid (CAP) under SEC Pay Versus Performance requirements.
. Developed a full PVP Proxy table and graphical disclosure integrating CAP, TSR, peer TSR, and financial performance metrics.

Data Engineering(Finance & Equity Research Intern), Checkit Analytics, La Jolla, CA 01/2026 - Present
. Built and maintained Python-based data ingestion and validation pipelines for FDA drug approvals and clinical pipeline data, producing clean, machine-learning-ready datasets to support healthcare equity research.
. Designed relational database schemas (PostgreSQL) and executed SQL-based data quality checks to ensure accuracy, consistency, and timeliness across multi-source datasets.
. Enhanced data pipeline reliability by implementing data validation, anomaly detection, and consistency checks across multi-source datasets, ensuring high data integrity for downstream analysis.

Projects

Contributor, Customer Churn Prediction (S-Mobile Case), Rady School of Management 02/2026
. Built and compared Logistic Regression and Random Forest models to predict customer churn; improved ROC-AUC through recency-based and behavioral feature engineering.
. Applied SHAP, permutation importance, and PDP to interpret non-linear effects and identify high-risk customer segments.
. Conducted targeting and CLV analysis to quantify business impact, translating model lift into ROI-driven retention strategy.

Contributor, SQL&ETL Project, Rady School of Management 09/2025
. Led a 3-member team to build an automated ETL/ELT pipeline in Snowflake using Python (snowflake-connector) and SQL-based transformations.
. Integrated multi-format datasets from CSV, XML, Postgres, and Snowflake Marketplace, improving data consistency across sources. To review correlation ofweather and purchasing patterns affecting product.
. Designed reproducible automation scripts to create warehouses, databases, schemas, and views, cutting manual setup time by 90% and coordinated version control and code reviews, ensuring project scalability.

SKILLS & ACTIVITIES

. AL/ML Syetems: LLMs(OpenAl, Gemini), Excel, Rag
. Programming: Excel, Python (Pandas, Polars, Scikit-learn) , NLP, Deep Learning, SQL, Tableau, R , SAS
. Cloud & Develops: AWS(EC2), Git, Docker
